SUMMARY

Computer Science and Design undergraduate (2027) at SJC Institute of Technology seeking Full Stack Developer, AI Engineering, or Software Engineering internship and entry-level opportunities. Skilled in building full-stack web applications and LLM-powered solutions using React.js, Node.js, Express.js, MongoDB, and LangChain.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL
Frameworks: React.js, Node.js, Express.js, LangChain
AI / ML: RAG, LLM Integration, AI Agents, PyTorch
Databases: MySQL, MongoDB, Supabase
Development Tools: Git, GitHub, VS Code, Figma, Antigravity, Vercel

EXPERIENCE

Full Stack Web Development Intern

Apr. 2026 – May 2026

ElevanceSkills

Remote

- Developed and deployed full-stack web features using **React.js** on the frontend and **Node.js/Express.js** on the backend, implementing RESTful APIs consumed by dynamic UI components.
- Designed and integrated **MongoDB** schemas for user and content management modules, optimising query performance through indexing and reducing average read latency.
- Collaborated in an agile remote environment, meeting all sprint deadlines and submitting deliverables ahead of schedule, demonstrating ownership and accountability across assigned tasks.

PROJECTS

MediScan AI – Medical Image Diagnostics Platform | *React.js, Node.js, Express.js, MongoDB*

- Built a full-stack AI diagnostics platform on a three-service microservice architecture (React client, Express/MongoDB API, FastAPI/PyTorch inference service) supporting chest X-ray, brain MRI, bone fracture, and CT scan analysis.
- Deployed DenseNet-121 models with Grad-CAM heatmaps, SHAP-style region analysis, and auto-generated clinical reasoning for explainable AI predictions, backed by JWT auth, RBAC, and PDF report generation.
- Live: medi-scan-wine.vercel.app | GitHub: github.com/Suraj190805/MediScan

Alerto – IoT Accident Detection & Emergency Alert System | *Arduino, Embedded C*

- Built an IoT device detecting vehicular collisions via accelerometer data and autonomously dispatching real-time GPS coordinates to emergency contacts via SMS/call.
- Integrated a manual override to suppress false alerts, reducing unnecessary emergency notifications.

Global Crisis Detection System | *Python, LangChain, LLMs, RAG, Multi-Agent Architecture*

- Built a multi-agent AI platform where specialized agents monitor global news, geopolitical conflicts, sanctions, and tariffs to analyse downstream impact on trade and commodity markets.
- Generates structured decision reports across economic, trade, energy, and social dimensions for stakeholder analysis.
- GitHub: github.com/Suraj190805/crisis-decision-system

EDUCATION

S J C Institute of Technology

B.E. – Computer Science & Design Engineering | CGPA: 8.97 / 10

Chikkaballapur, India

Aug. 2023 – May 2027

CERTIFICATIONS

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional – Oracle University, Oct 2025
Advanced Software Engineering Job Simulation – Walmart Global Tech (Forage), Jun 2026
Software Engineering Job Simulation – JPMorgan Chase Co. (Forage), Jun 2026
Data Structures and Algorithms using Java – NPTEL, IIT Kharagpur, Jul–Oct 2025
